

REACT Outside Perspectives

Corporate/Institutional/Public Service Video

Prevention is about so much more than just saying, “No.”

In the summer of 2021, Morgan REACT students embarked on an outdoor adventure to build leadership skills, strengthen mental health, and learn a new approach to substance use prevention.

This unique outdoor opportunity gave a special group of students a way to find themselves while on an adventure, learning to work together and support one another, on the trail, in camp, and most importantly, in life back at home.
