

HeyLet'sGo! – 2022 Holiday Video

MUSIC: Odd, discordant piano notes and sleigh bells. In vaguely Christmas-y music style.

VIDEO: Montage of cheery holiday scenes. Snow, presents, decorations, gatherings, snowmen, smiles, all-round good cheer.

EMOTIONLESS, AI-GENERATED, ROBOTIC VOICE OVER:

Fa-la-la-la.

Snow!

And reindeer.

And good tidings for all mankind.

At HeyLet'sGo!, we love new ideas, innovations, and technology.

So we made this holiday song using AI.

It came out totally crappy.

And reminds us how much we appreciate all our human collaborators.

Thinking back on the projects we did together this year brings us true holiday joy.

And not the artificial kind.

Fa-la-la-la.

AGENCY LOGO OVER SHINY ORNAMENTS.
