

Nurture

Nurture is rooted in the values my father taught me: work hard, care deeply, and never overlook the little things. I remember the sound of his truck pulling into the driveway late at night. That low rumble still reminds me of his dedication. He showed me that real passion means committing fully to your craft, your choices, and the people you serve.

He also taught me how small acts of kindness can have a lasting impact. Sharing the last bite of a meal or helping a neighbor might seem simple, but they reflect something much bigger. This book is a tribute to that spirit. It's about nurturing relationships, honoring your roots, and creating beauty and meaning through food and design. Whether in a kitchen or a restaurant, when you put care into the details, people feel it. This is the essence of *Nurture*, and the legacy I hope to carry forward.
