

ONDAS

Abstract Animation For Public Art Display

Creative exploration fuels my everyday! Through immersive sight and sound, my work experiments with evolving forms and dynamic spatial compositions. At its core, the work seeks a deep connection between biological perception and visual expression, translating sensation into abstract motion. Shape, light, and movement operate as a visual language, articulating what is often felt but not easily described.

The visuals encompasses a variety of motion graphics techniques such as particle simulations, 3D geometry, and complex symmetry.

ONDAS is a 3 minute abstract animation emulating good vibrations. Inspired by sound waves, this piece is very ethereal and maintains a hypnotic quality throughout. ONDAS abstract art animation is exhibited in Bradley International Airport in Hartford CT, has made appearances in Arts & Ideas Festival in New Haven CT, and Gloze Museum in Houston, Texas.
