THE CHALLENGE

How do you bring the orchard experience online?

Scott's Orchard has been a destination for fresh flavors and family traditions for generations. Bringing the orchard's welcoming atmosphere online meant designing a digital experience that feels as authentic and inviting as the farm itself.

THE BUILD

The site was thoughtfully crafted to mirror the orchard experience: warm, approachable, and full of discovery. Every page encourages exploration through engaging visuals, clear pathways, and thoughtful content organization, making it easy for visitors to uncover everything from pick-your-own adventures to seasonal events.

THE RESULT

A digital home that reflects the warmth of the orchard, pairing cohesive design with adaptable content to keep the experience fresh throughout the year.
